

STEVEN E. PATCH

EDUCATION

University of Maine, B.S. in Civil Engineering, 1983

University of Maine, B.S. in Forestry Engineering, 1980

Special Courses

- Sanitary Landfill Design, 1985 - University of Wisconsin
- NUS Seminar for Hazardous Materials Handling, 1985 - Pittsburgh, PA
- Maine Cumberland County Soil and Water Conservation District "Stormwater Management (TR-55) and Best Management Practices" – 1992 Lewiston, Maine
- The Soil and Water Conservation Society and the International Erosion Control Association "Certified Professional in Erosion and Sediment Control Seminar" – 2000 Augusta, Maine

PROFESSIONAL REGISTRATION

Professional Engineer - Maine

AFFILIATIONS

American Society of Civil Engineers, Associate Member

EMPLOYMENT HISTORY

Currently from 1989 - Sevee & Maher Engineers, Inc., Senior Project Engineer

1985 to 1989 - Abington Constructors, Inc., Portsmouth, New Hampshire, Assistant Project Manager, Estimator

1983 to 1985 - E.C. Jordan Co., Portland, Maine, Environmental Engineer

1980 to 1983 - Seaward Construction, Kittery, Maine, Field Engineer

EXPERIENCE

Mr. Patch has extensive experience in a variety of environmental, civil and heavy mechanical construction projects. He is experienced in the design, permitting and licensing of a number of municipal and industrial landfills throughout New England. His work in solid waste management has included the design of leachate collection systems, drainage and erosion control systems, leachate holding ponds, lagoon impoundments and pump stations. He is also experienced in the use of computer-aided solutions to facilitate water balance determinations and leachate collection system performance evaluations, including elements of the Hydrological Evaluation of Landfill Performance (HELP) model. He has been directly involved in the preparation and oversight of numerous Stormwater Management and Erosion Control Plans for the landfill design projects he has managed.

Steve was extensively involved with the EPA RCRA 3012 program for the State of Florida. His work involved the preparation of preliminary assessments for 110 sites, including site inspections and field sampling of 40 selected sites throughout the state. He has also been involved as a field engineer and assistance project manager on a number of civil and heavy mechanical construction

EXPERIENCE (cont'd)

projects, including: Bath Iron works Expansion Project, Portland, Maine (\$20M); National Gypsum Building Products, Portsmouth Plant (\$2.5M); United States Gypsum Plant Expansion, Stony Point, New York (\$1.5M); Portsmouth Naval Shipyard 165-ton Stiff Leg Derrick Crane (\$4.5M).
