

MARK S. ROBINSON

4 Blanchard Road, PO Box 85A, Cumberland Center, ME 04021
Phone 207.829.5016 • Fax 207.829.5692 • www.smemaine.com

EDUCATION

Boston College – B.A. in Economics, 1982
University of Maine – B.S. Civil Engineering, 1989

EMPLOYMENT HISTORY

Currently from 1991 - Sevee & Maher Engineers, Inc.; Staff Geotechnical Engineer
1991 from 1989 - Sevee & Maher Engineers; Geotechnical Laboratory Manager

EXPERIENCE

Directed and executed a variety of geotechnical projects from investigation through design and construction. Project duties typically involve assigning and interpreting geotechnical and geosynthetic laboratory test results; working with other geotechnical engineers, geophysicists, structural engineers, and hydrogeologists; field oversight of soil borings, test pits, monitoring wells, piezometers, inclinometers, pressure meters, and data acquisition systems. Conducts geotechnical investigations for large geotechnical projects, including landfills and commercial structures. Projects include geotechnical engineering evaluations for foundation design, settlement analyses, slope stability analyses, design of landfill liner and cover systems, and seismic response analyses.

Conducted field investigations on hazardous waste projects, including test pits, soil borings and well installations. These projects involved soil and groundwater remediation and product recovery.

SPECIAL SKILLS

- Geotechnical Engineering
- Geotechnical Instrumentation and Data Analysis
- Computer Model Development – Geotechnical
- Remediation System Design – Product Recovery
- Seismic Stability Analysis and Liquefaction Analysis
